- PoE powered with no need for local power
- No network configuration required
- Built-in network switch technology for reliable transmission
- Full network bandwidth 100/1000Mbps for transmitting the highest megapixel cameras and extending network switch to switch communications
- PoE power up to 30W for high power PTZ without the need for local power or ability to provide local power for longer distances and higher power PTZ dome applications
- Extremely compact size enables easy installation
- Multiple Vi3602s can be used to extend IP video and PoE at distances up to 3000ft.

Applications

- Extends network switch backbones for distances greater than 328 ft. (100m)
- Prevents packet and bandwidth loss for transmitting high megapixel cameras
- Provides highest bandwidth transmission for multi-image cameras
- Provides PoE to high PoE cameras for when power sources are separated by more than 328 ft. (100m)
- Provides a convenient and cost effective method to transmit and power multiple cameras over a single cable when combined with Vigitron's 1G high powered hardware switches with Pass-Through-PoE
- Cost effective solution for parking lots, garages, perimeter fences and building-to-building communications, and PoE transmission

The Vi3602 is an Ethernet and 30W PoE repeater that provides a cost effective method for increasing distances beyond the Ethernet limit of 328 feet (100m) for IT or CCTV installations at network speeds up to 1000Mbps. Each unit can extend Ethernet and PoE for 328 feet (100m). Multiple units can be cascaded to reach the desired distances. The Vi3602 is a high performance device that meets the demands for the highest PoE powered PTZ domes and LED lighting eliminating the need for local power or providing the ability to add PoE power.

Removable mounting brackets make installation an easy process. The Vi3602 is the perfect solution for any IP transmission application. Up to 4 units can be combined to achieve a distance of 1,450 feet (442m) for IP video, PoE, and data transmission.

It is an ideal solution for extending data, video, and power from PoE switches, Midspans, Power Source Equipment (PSE) and extending communications between network switches.
